### **Shaken Baby Syndrome Questions**

1. What age group is affected by SBS and what does the abbreviation SBS stand for?
  
2. Why is shaking a crying baby so dangerous?
  
3. Besides death, what serious injuries can result from shaking an infant? Name six of the 11 injuries.
  
4. Which of these is not a symptom of SBS:
  - Blood pooling in the eyes
  - Pupils unequal in size
  - Unable to lift or turn head
  - Excessive sleeping
  - Decreased muscle tone
  - Swollen head
  - Poor sucking or swallowing
  - Semi-consciousness
  
5. What are two visible warning signs of injury from SBS?
  
6. Why do parents/caregivers delay or refrain from reporting injuries or the suspicions of injury from SBS?

7. How can you prevent SBS and protect your children from SBS?
  
8. After you check the crying baby's basic needs, what other steps can you take to comfort the baby?
  
9. How can you take care of yourself when you have reached your limits and the crying is on your last nerve?
